

Inventory Management System - Final Year Project Roadmap

Phase 1: Planning & Requirement Gathering

- Decide platform: Web ya Desktop?
- Decide Tech Stack (example: Node.js + MongoDB + HTML/CSS)
- Finalize features (Add, Update, Delete, Search, Alerts, etc.)
- Draw UI rough sketch (paper or tool like Figma)

Phase 2: Project Setup

- Create project folder and initialize with `npm init` (Node.js)
- Setup backend (Express.js)
- Setup database (MongoDB or MySQL)
- Setup frontend (HTML, CSS, Bootstrap or React if advanced)

Phase 3: Backend Development

- Create product schema (name, category, quantity, price, etc.)
- Create API Routes:
 - GET /products - Show all products
 - POST /products - Add new product
 - PUT /products/:id - Update product
 - DELETE /products/:id - Delete product
- Connect routes to database (CRUD operations)
- Add validation and error handling

Phase 4: Frontend Development

- Design UI (Navbar, Forms, Table View)
- Create form for adding new product

Inventory Management System - Final Year Project Roadmap

- Show all products in table
- Add "Edit" & "Delete" buttons for each row
- Add low-stock color indication (e.g., red background if quantity < 10)
- Add search bar and filter by category

Phase 5: Extra Features (Optional but Impressive)

- Login system for admin
- Sales Management (reduce stock)
- Export inventory to Excel/PDF
- Add graphs/charts for stock analysis (use Chart.js)
- Notifications for low stock
- Responsive design for mobile

Phase 6: Testing

- Test all CRUD operations
- Test form validations
- Check for broken links/buttons
- Test responsiveness (desktop/tablet/mobile)

Phase 7: Deployment

- Host on Render/Glitch (for free Node.js apps)
- Or deploy frontend on Netlify + backend on Render
- Connect to cloud database (MongoDB Atlas or Railway)

Bonus: Documentation

Inventory Management System - Final Year Project Roadmap

- Write README file
- Add screenshots of your project
- Mention how to run it locally

Final Outcome

A complete Inventory Management System jisme aap products ko easily manage kar sakte hain professional looking, functional, and good for resume + demos!
